

# Test Credentials for Apollo.ai

---

## Admin User

---

- **Email:** john@doe.com
- **Password:** johndoe123
- **Role:** ADMIN

## Standard User

---

- **Email:** test@email.com
- **Password:** password123
- **Role:** USER

## Testing the Application

---

The authentication forms use HTML5 validation and require all fields to be filled. This is expected behavior to ensure data integrity.

To test:

1. Navigate to the homepage (/)
2. Fill in the email and password fields with credentials above
3. Click "Sign In"

## Database Seeding

---

The database includes sample data across 5 databases:

- Sales, HR, Inventory, Finance, Customer Support

All advanced features are ready to test including:

- Natural Language Queries
- Schema Discovery
- Query Explanations
- Query Sharing (Deep Links)
- Multi-Database Connections
- Data Export (CSV, JSON, PDF)
- PII Masking
- Audit Logging
